

## ADOLESCENT

Do you want to prevent cancer?

YES NO

Good for you, we want to know you later too. If you did not start or finish the HPV vaccine series when you were younger, you should demand to get it now! What's wrong with your parents! Talk to them now about getting you the vaccination.

Wrong answer, try again.

Are you sexually active?

YES NO

Be safe about it.

If you are a **guy**, wrap it up.

If you are a **lady**, insist that you or your partner is using a condom.

STAY  
INFORMED  
ABOUT HPV!

## YOUNG ADULT (AGES 18-24)

Have you ever been skin to skin with your lover?

YES NO

**BOYS**  
Have you completed the vaccine series?

**GIRL**  
Have you completed the vaccine series?

WE DON'T BELIEVE YOU.

YES

Good for you, still wrap it up during sex!

NO

Talk to your doctor asap to get the vaccination. Boys can get the vaccination up to age 21.

YES

Good for you, talk to your doctor, you still have to get regular papsmears.

NO

Talk to your doctor ASAP to get the vaccination or complete the series. Girls can get the vaccine up to age 26.

## ADULT

### MAN

There is no regularly approved screening for men. However, talk to your doc to find out if you are at increased risk. Some men can get screened for anal cancer.

### WOMAN

Talk to your doctor, you still have to get regular papsmears. Continue to practice safe sex!

Do you have kids under 18?

(GO TO PARENT SECTION)

## PARENT

DO YOU WANT TO PREVENT CANCER FOR YOUR CHILDREN?

YES

ARE YOUR KIDS BETWEEN THE AGES 9-12?

YES

You're in luck! This is the ideal time to talk to your doc about the 3 series HPV vac that prevents cancer.

NO

WHAT'S WRONG WITH YOU?

NO

ARE YOUR KIDS OLDER THAN 12?

If they haven't already received the 3 vac series, a great time to get the vac is before they are sexually active. This is the most effective time to get the vac so that they are protected before ever being exposed to the virus.

## HEALTH PROFESSIONAL

Did you know that a health provider recommendation is the biggest influencing factor in vaccination uptake?

YES

Make sure you are talking to patients and/or parents about this anti cancer vaccine.

NO

Its time you read up and free this next generation of hpv associated cancers.
